# Global Innovation and Talent Leader

- #1 Global Innovation Index<sup>1</sup>**
- #1 European Innovation Scoreboard<sup>2</sup>**
- #1 Global Talent Competitiveness Index<sup>3</sup>**
- #1 World Talent Ranking<sup>4</sup>**
- #1 ETH Zurich named best university outside of the US and UK<sup>5</sup>**

<sup>1</sup> WIPO & Portulans Institute, 2023

<sup>2</sup> European Commission, 2023

<sup>3</sup> INSEAD, Human Capital Leadership Institute & Descartes Institute for the Future, 2023

<sup>4</sup> IMD, 2023

<sup>5</sup> Times Higher Education, World University Ranking 2024

# ETH Among Top CV Research Institutions

Between 2014 - 2024 ETH was **top 7** CV contributor **world-wide** and the **leading** institution in **Europe**.<sup>1</sup>

IEEE / CVF Conference on Computer Vision and Pattern Recognition (CVPR) is the **premiere Computer Science** venue.

At CVPR 2022 ETH was **top 3** contributor and the **leading** institution in **Europe/America**.<sup>2</sup>

<sup>1</sup>According to CSRankings, <https://csrankings.org/#/index?vision&world>

<sup>2</sup>According to statistics from CVPR <https://twitter.com/CSProfKGD/status/1555010601692299264/photo/2>

# ETH AI Center's Unique Position

# **Human-Centric CV**

Overview & Recent Developments

# Performance Capture in 1883

# Performance Capture Today

**AI AGENTS**

[3]

[4]

[5]

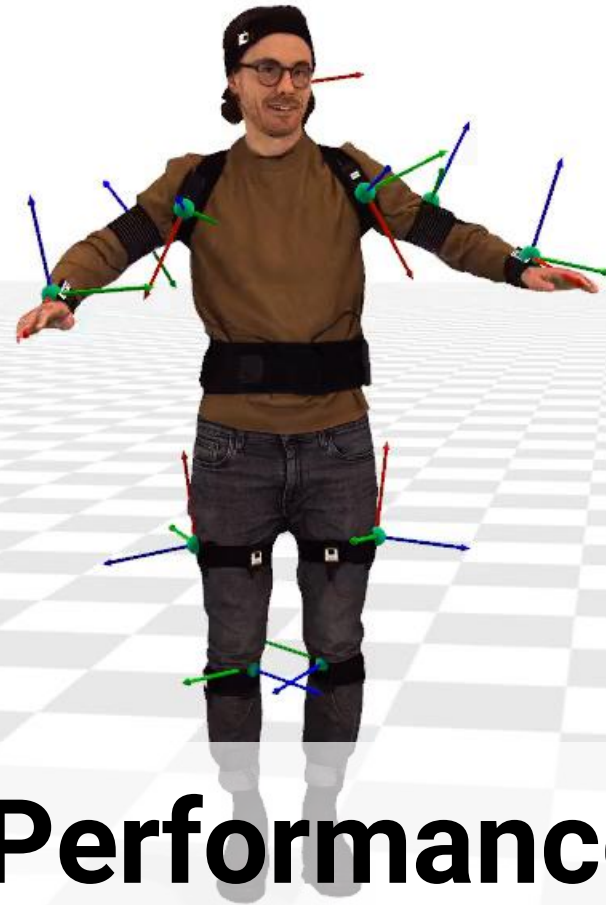

[6]

# High-End Volumetric Capture

# Monocular Image-Based Pose Estimation

# Sensor-Based Performance Capture

here with body-worn 6-DoF Sensors

[\[Kaufmann et al., EMDB, ICCV, 2023\]](#)

# In-The-Wild Recordings with Body-Worn Sensors

**SPEED X2**

 SMPL Root Trajectory  Camera Trajectory

# Human Performance Is More Than Pose

Skilled Hand-Object Interaction

Close Interaction with Contact Between Humans

Can we bring a machine to perceive the human holistically in 3D given only a single input video?

Dynamically Deforming Clothing

Coordinated Interaction in Large Numbers

# What Has Been Driving Progress?

Inductive biases and statistical body models

[Loper et al., SMPL,  
Siggraph Asia 2015]

Advanced Deep Learning architectures and compute

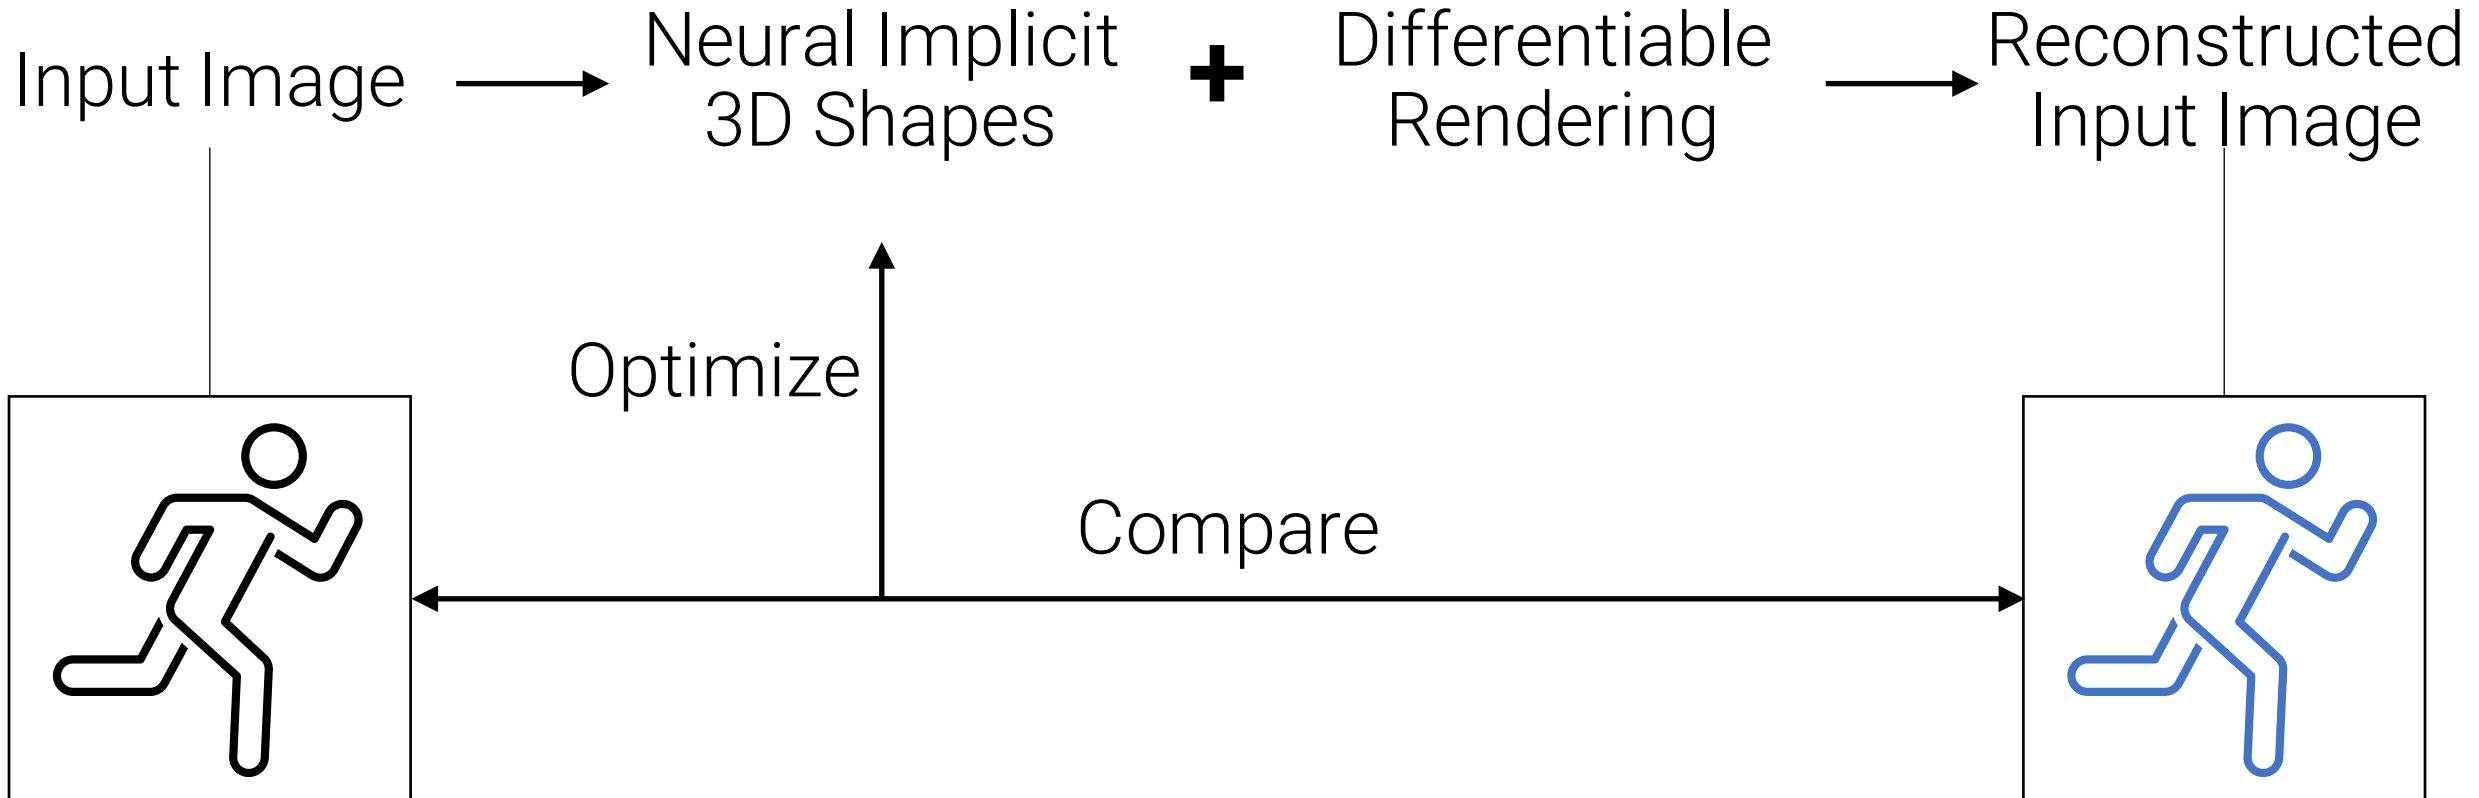

Availability of data\*

# A Promising New Paradigm

# Learning Avatars from Monocular Videos

# Multiple Humans In Interaction

Input

Reconstructions

3D Instances

3D Novel View

# Hands and Objects

Input Video

Reconstructed hand and object surfaces

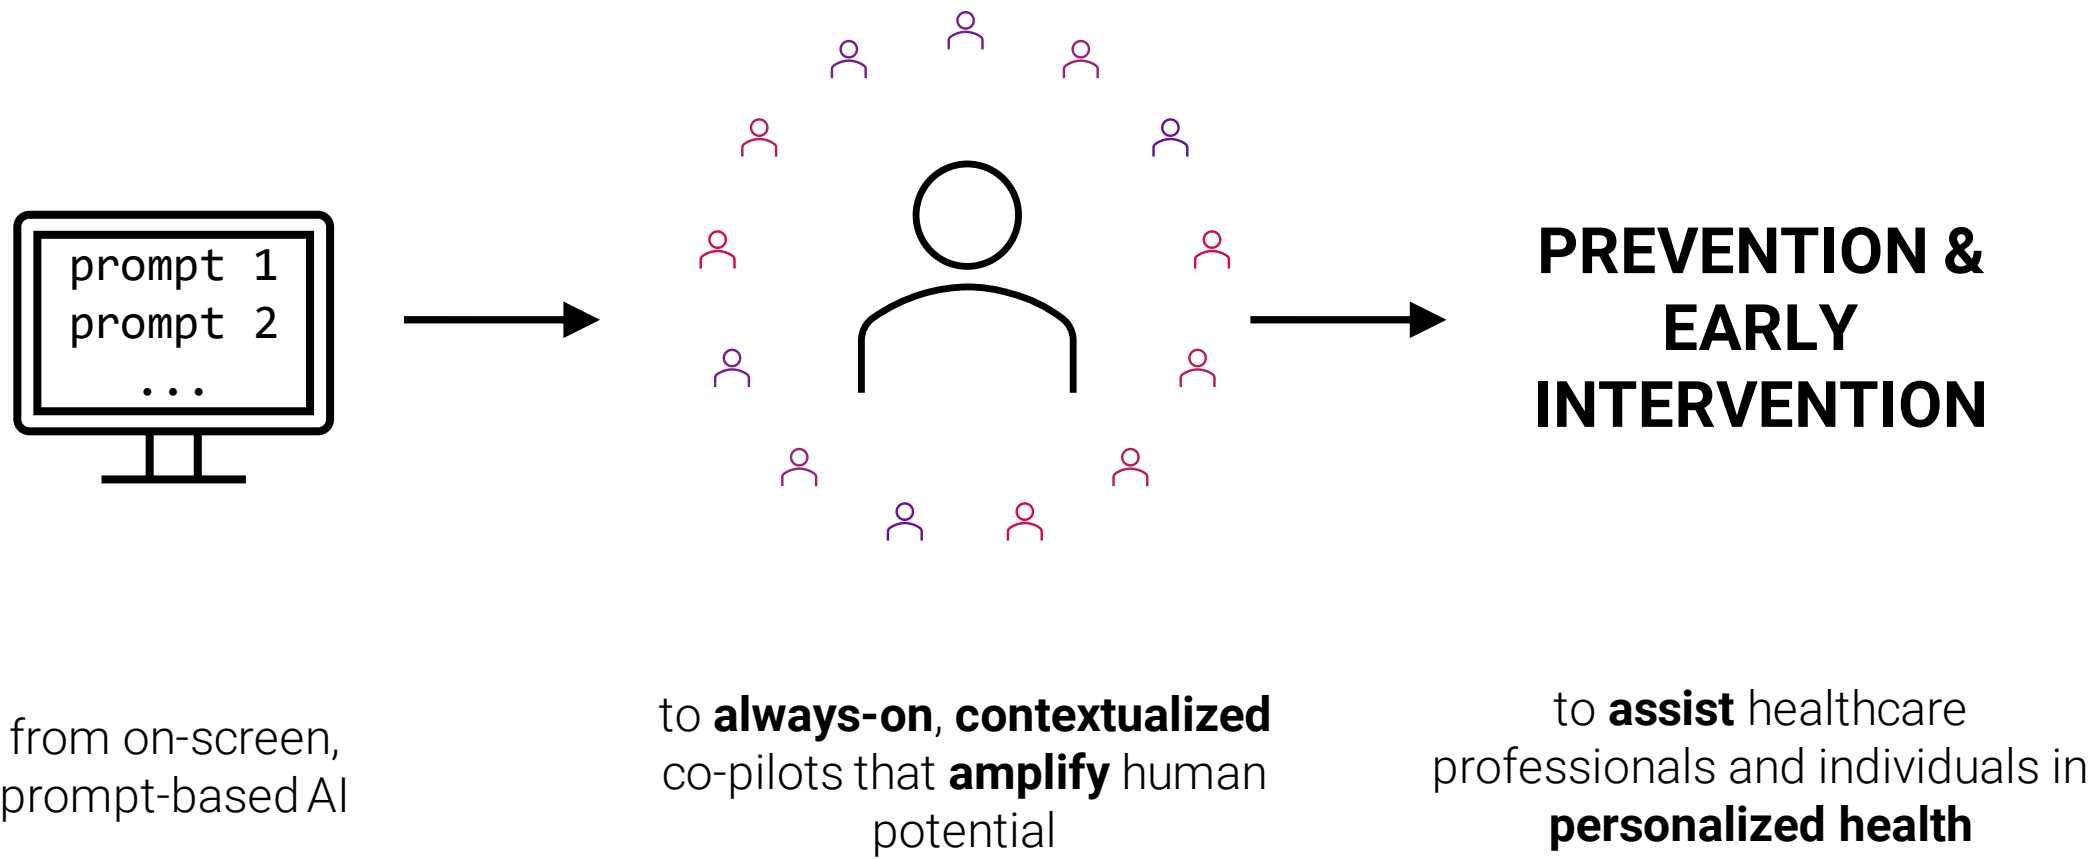

# Hands and Objects

# Outlook

Human-Centric AI for Health

# The AI Assistant of the Future

# Enabled By Contextual Awareness

**MULTIPLE DEVICES  
& USERS**

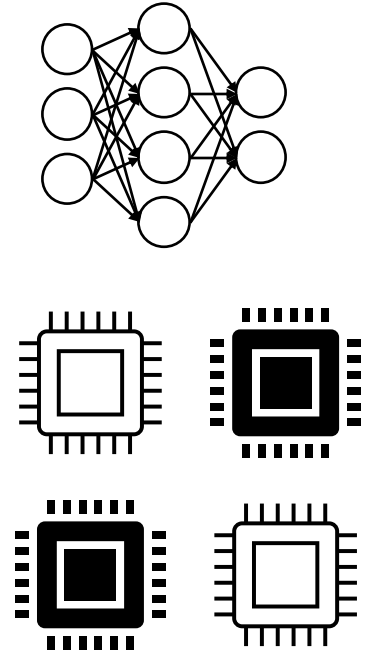

**TRACKING  
ENVIRONMENT**

**EGOCENTRIC  
FOUNDATION  
MODELS**

In The Wild  
Lab-Based  
Simulated

# Topic 1

## Egocentric AI for Healthcare Professionals to Support Error Prevention

Multimodal digitization of realistic surgeries in living lab conditions:

- multi-person tracking
- object tracking
- exo- and egocentric views
- eye tracking
- audio including commentary

Strategic partnership between OR-X and the ETH AI Center to research the future of surgery.

# Topic 2

## Advanced Preventive Care In the Wild

Move preventive medicine out of the hospital into people's homes.

- Establish new correlations between diseases and wearable health data.
- Provide expert information based on long-term tracking.
- E.g., continued gait analysis from few sensors.
- E.g., standardize and simplify clinical tests

# ETH AI Center

120 associated faculty, 30 related to health, machine learning, computer vision, > 60 affiliated industry partners

## Strategic Research Platform

Human-Centric Data Acquisition

Various recording devices and data capture platforms

Large-Scale Compute via Swiss AI Initiative, ALPS Super-Computer at CSCS
